Appendix: Survey Questionnaire		165

Introduction

Saskatchewan Education conducts an annual survey of graduates of post-secondary programs offered through the Saskatchewan Institute of Applied Science and Technology (SIAST). This **Graduate Follow-Up Survey** collects data and opinions on a variety of questions related to the graduates' employment status, occupation, employment search, relationship of training to occupation and general evaluation of the training received.

The Employment Statistics Report provides information on training programs which is not readily available elsewhere. It is used by students and counsellors in selecting programs of study. Those planning future training or studying changes in labour market conditions also find the information useful.

The Employment Statistics Report presents selected results from the **1988 Graduate Follow-Up Survey**. Employment related information is shown for each training program, as well as notes on each page as further explanation of the employment situation and training program. For further information about these and other programs, please contact:

CROSSROADS: Information about SIAST and other post-secondary education programs may be accessed through the CROSSROADS computerized career information system. CROSSROADS provides information about programs and the institutions which provide them, and how high school subjects and occupations are linked to these post-secondary programs. It is designed to help prospective students, counsellors and instructors find specific information quickly and effectively. The CROSSROADS system can be accessed through any SIAST campus or Regional College or through several high schools in Saskatchewan. For further information about the system please contact:

Methodology

Scope

The **Graduate Follow-Up Survey**, on which this report is based, includes 1987-88 graduates from all Saskatchewan Institute of Applied Science and Technology (SIAST) campuses: Kelsey in Saskatoon, Palliser in Moose Jaw, Wascana in Regina and Woodland in Prince Albert. The training programs surveyed are generally certificate or diploma programs offered on-campus and lasting 12 weeks or longer. Most graduates complete their program in the Spring and are surveyed six months later, in December.

Programs not included in this survey are Apprenticeship, Saskatchewan Skills Extension, Saskatchewan Skills Development, upgrading, employer-based or other special programs. A new program which has not yet produced graduates may not be included. In 1987-88, 105 SIAST programs were surveyed.

Procedures

SIAST campuses supplied graduate lists (names and addresses) to the department. These were supplemented by lists from the department's Student Information System. A questionnaire and covering letter was mailed to each graduate with a postage-paid return envelope. The graduate was asked to complete a four page questionnaire (see Appendix). Those graduates who have not returned a completed questionnaire by three to four weeks after the initial mailing are sent the same questionnaire again in a second, follow-up mailing.

A number of questionnaires are returned as non-deliverable, usually because of the lack of a current address as graduates tend to move after graduation. The response rate is not adjusted for non deliverable questionnaires and they are considered non respondents. Some graduates are contacted by telephone in order to improve the response rates for some programs.

Completed questionnaires are read and coded for occupation, industry, location and salary information, and checked for completeness. Coded questionnaires are data entered using a personal computer system and *dBase III plus* software.

Once questionnaire responses have been entered on the computer database, the data is sorted for each individual training program included in the survey and for each larger program group. The databases are then analyzed by programs written in *dBase III plus* and information is generated for inclusion in the **Employment Statistics Report**.

The information for each training program is included on a single page for each program. The overall analysis for each program group (Business, Health, Industrial, Service, Technology) and for all programs is contained the Overview of Results section of the report.

The report is written and final pages of the report are produced with *Word Perfect* word processing software.

Response

The survey is not a random sample survey. Rather, a specific population is surveyed in whole, and a percentage of the population responds. Results describe the entire respondent population and statistical methods used in random sample surveys do not generally apply.

It should be noted that results of the survey apply to a particular point in time, while the situation of the graduate will change over time.

Overview of Results

Response Rate

This year's survey included 2,410 graduates from 1987-88 from 103 training programs. 1,239 useable questionnaires were returned for an overall response rate of 51% (see Table 1). Within program categories, Health programs had the highest response rate at 56%. (Please see the Table of Contents for a listing of the programs included within each program group).

Table 1
Response Rate

Program Group	Graduates	Respondents	Response Rate
	#	#	%
Business	429	224	52
Health	645	362	56
Industrial	795	393	49
Service	231	103	45
Technology	310	157	51
Overall	2,410	1,239	51%

Employment Status

Of the 1,239 survey respondents, 84% (N=1,037) were employed at the time of the survey (see Table 2). This includes graduates who were employed in any occupation on a full time, part time or self employed basis. It includes graduates in training related jobs as well as those in other occupations.

Health programs had the highest overall employment rate at 94% of respondents. As indicated in Table 2, 12% (N=152) of the respondents were unemployed, i.e. looking for work, while 4% (N=50) were not in the labour force, i.e. not looking for work. The highest unemployment rate (19%) was among Industrial program respondents. Further analysis indicates that 5% of employed respondents (N=56) were also attending school at the time of the survey.

Table 2
Respondents: Employed, Unemployed, or Not In The Labour Force

Group	Employed		Unemployed		Not In The Labour Force		Respondents
	#	%	#	%	#	%	#
Business	183	82	30	13	11	5	224
Health	342	94	9	3	11	3	362
Industrial	298	76	76	19	19	5	393
Service	84	81	12	12	7	7	103
Technology	130	83	25	16	2	1	157
Overall	1,037	84%	152	12%	50	4%	1,239

Of the 1,037 respondents employed at the time of the survey, 90% (N=939) were employed in training related occupations, i.e. those where they used some or all of the skills acquired in their program (see Table 3). Respondents from Health programs had the highest rate of training related employment at 99%.

Table 3
Training Related and Non Training Related Employment

Program Group	Training Related Employment		Non Training Related Employment		Total Employed
	#	%	#	%	#
Business	163	89	20	11	183
Health	338	99	4	1	342
Industrial	241	81	57	19	298
Service	80	95	4	5	84
Technology	117	90	13	10	130
Overall	939	90%	98	10%	1,037

Further analysis of respondents employed in training related occupations indicates that overall, 82% (N=774) were employed full time, 16% (N=148) were employed part time and 2% (N=17) were self employed (see Table 4).

Within program groups, respondents from Technology programs had the highest rate of full time employment in training related occupations at 95% (N=111). Three in ten (N=103) Health program respondents in training related occupations were working part time. As well, the survey indicated that, overall, 69% (N=102) of respondents working part time in training related occupations were looking for full time employment.

Table 4
Training Related Employment:
Full Time, Part Time, Self Employed

Program Group	Full Time		Part Time		Self Employed		Total Training Related Employed
	#	%	#	%	#	%	#
Business	151	93	10	6	2	1	163
Health	235	70	103	30	0	0	338
Industrial	221	92	11	4	9	4	241
Service	56	70	20	25	4	5	80
Technology	111	95	4	3	2	2	117
Overall	774	82%	148	16%	17	2%	939

As indicated in Table 5, 78% (N=158) of respondents who were not employed at the time of the survey had worked for an average of five months since completing their program. More than half of non employed respondents (55%) had worked in a trainining related occupation.

Industrial programs had the greatest number of respondents (N=95) who were not employed at the time of the survey. For those who completed Industrial programs, 86% (N=82) had worked since graduation even though they were not employed at the time of the survey.

Table 5
Not Employed - But Has Worked Since Completing Training

Program Group	Worked Since Completing Program		Average Months Worked	Worked in Training Related Occupation		Total Not Employed
	#	%	#	#	%	#
Business	29	71	5	14	34	41
Health	12	60	5	9	45	20
Industrial	82	86	5	63	66	95
Service	15	79	6	12	63	19
Technology	20	74	6	14	52	27
Overall	158	78%	5	112	55%	202

Of those respondents (N=152) who were unemployed, i.e., looking for work at the time of the survey, more than one third (38%) indicated they could not find employment because no jobs were available (see Table 6). Nearly one quarter (23%) felt their lack of experience acted as a deterrent to finding work while another 14% attributed it to seasonal employment.

Table 6
Unemployed
Respondents' Reasons For Not Finding A Job

Reason	#	%
No Jobs Available	58	38
Not Enough Experience	35	23
Employment Is Seasonal	22	14
No Jobs In Desired Location	17	11
Training Inadequate	1	1
Other	19	13
Total	152	100%

As indicated in Table 7, the main reasons respondents (N=50) who were not in the labour force were not looking for work was because of their return to school (54%) or their family responsibilities (30%). Further analysis indicates that 82%, or nine out of eleven respondents from Business programs who were out of the labour force had returned to school.

Table 7
Not In The Labour Force
Reasons For Not Looking For Work

Reason	#	%
Returned To School	27	54
Family Responsibilities	15	30
Health/Disability	4	8
Discouraged With Looking	0	0
Other	4	8
Total	50	100%

Employment Search

Respondents who had obtained employment were asked to indicate if they had used any of several methods to find employment. Those who answered this question could each choose more than one response from the list of choices given.

As shown in Table 8, the most common methods of finding employment among the respondents were through initiating their own inquiries (27%) or personal contact (25%). Nearly one fifth (17%) used advertisements while approximately one in ten (12%) were assisted by a SIAST instructor or counsellor.

There were some differences among program groups in the methods respondents used to find employment. For example, while respondents from Business (23%), Health (35%) and Technology (22%) programs said that initiating their own inquiries was the most frequent method used, those from Industrial (29%) and Service (28%) programs indicated that a personal contact or reference was preferred over other methods.

Newspaper or media advertisements were used more by graduates of Service (21%) or Technology (21%) programs than those from other programs. Respondents from Technology programs were more likely than others to use either SIAST personnel or a Canada Employment Centre. Returning to a former employer was most popular among those from Service programs (8%).

Table 8
Employed Respondents:
Methods Used To Find Employment
By Program Group

Method Used	Business	Health	Industrial	Service	Technology	Overall
	%	%	%	%	%	%
Initiated My Own Inquiries	23	35	25	24	22	27
Personal Contact/ Reference	21	24	29	28	19	25
Newspaper/ Media Advertisement	19	16	14	21	21	17
SIAST Instructor/ Counsellor	11	11	12	11	15	12
Canada Employment Centre	11	5	10	4	15	8
Returned To Former Employer	6	6	7	8	4	7
Other	9	3	3	4	4	4
Total	100%	100%	100%	100%	100%	100%

Note: Respondents could choose more than one response. Percentages are based on all responses received.

When asked what types of further assistance were required in finding employment, the most common suggestions from all respondents were contacts with employers (40%), resume writing (21%) and interview skills (18%) (see Table 9).

All program groups except Health indicated that employer contacts would be of most assistance to the respondents in finding employment. Health program respondents indicated help with resume writing would be of most value to them in this area.

Table 9
All Respondents: Further Assistance Required When Seeking Employment

Types of Further Assistance Required	Business	Health	Industrial	Service	Technology	Overall
	%	%	%	%	%	%
Employer Contacts	41	29	48	35	45	40
Resume Writing	15	33	18	23	17	21
Interview Skills	18	22	14	22	17	18
Job Search Workshop	12	5	8	8	6	8
Career Counselling	8	7	7	9	8	8
Other	6	4	5	3	7	5
Total	100%	100%	100%	100%	100%	100%

Note: Respondents could choose more than one response. Percentages are based on all responses received.

All respondents were asked to indicate if, prior to taking their training program, they had either training or work experience which was related to the type of program they completed at SIAST.

As shown in Table 10, 22% of respondents indicated that they had some prior training related to their training program while 35% of respondents said they had prior work experience related to their training.

The group with the highest percentage of related prior training is the Health program respondents (24%). More than half (54%) of Service program respondents indicated they had prior work experience related to their SIAST program.

Table 10
All Respondents:
Prior Training or Work Experience Related to Training Program

Group	Prior Training		Work Experience		Total Respondents
	#	%	#	%	#
Business	47	21	45	20	224
Health	85	24	111	31	362
Industrial	85	22	188	48	393
Service	15	15	56	54	103
Technology	34	22	32	20	157
Overall	266	22%	432	35%	1,239

A similar profile in regard to prior training and work experience is evident among respondents who had obtained training related employment after graduation (see Table 11). Of those employed in training related employment at the time of the survey (N=939), 22% said they had prior training related to the type of SIAST program they completed while 36% indicated they had prior work experience related to their training program.

The Health group shows the largest percentage of those in training related employment who had prior training related to their program (24%). Training related employed respondents from Service programs had the highest percentage with prior work experience related to their program (54%).

Table 11
Respondents Employed In Training Related Occupations:
Prior Training or Work Experience Related to Training Program

Group	Prior Training		Work Experience		Training Related Employment
	#	%	#	%	#
Business	37	23	35	22	163
Health	82	24	105	31	338
Industrial	49	20	125	52	241
Service	13	16	43	54	80
Technology	26	22	28	24	117
Overall	207	22%	336	36%	939

Respondents who were employed at the time of the survey were asked what they were doing prior to their present job but after their graduation (see Table 12). Nearly 40% of the respondents stated they had changed jobs since graduation while a similar percentage (36%) indicated they had held their present job since immediately after graduation. One in five of the respondents employed at the time of the survey indicated they had been unemployed following graduation and prior to obtaining their present job.

An analysis by program group of the activities of employed respondents prior to their present job but after graduation indicates that Industrial program respondents were the most likely to have changed jobs since graduation (51%) while Health program graduates were the most likely to have been employed in the same position since graduation (48%). A similar percentage of employed respondents from Service (28%), Business (27%) and Technology (25%) programs had been unemployed since graduation and prior to obtaining their present job.

Table 12
Employed Respondents:
Activity Prior To Present Job and After Completing Program
All Occupations

Activity	Business	Health	Industrial	Service	Technology	Overall
	%	%	%	%	%	%
Employed in a job(s) other than present job	36	26	51	43	46	39
Unemployed (looking for work)	27	18	15	28	25	20
Out of the labour force (not employed and not looking for work)	3	8	2	5	3	5
None of the above, obtained job immediately after completing training program	34	48	32	24	26	36
Total	100%	100%	100%	100%	100%	100%

Training Program

All respondents were asked to choose the most significant reason for taking their training program. One-half of respondents indicated general interest or education was the most significant reason for taking their training while 42% took their training to help find employment.

Within program groups, nearly two-thirds (64%) of Health program respondents and more than one-half (54%) of Service program respondents took their training for general interest or education. More than half of Business program respondents (55%) and half of Technology (50%) and Industrial (47%) program respondents took their training to help them find employment.

Table 13
All Respondents:
Most Significant Reason For Taking Training Program

Activity	Business	Health	Industrial	Service	Technology	Overall
	%	%	%	%	%	%
General Interest/ Education	35	64	46	54	41	50
To Help Find Employment	55	29	47	33	50	42
Other	10	7	7	13	9	8
Total	100%	100%	100%	100%	100%	100%

As indicated in Table 14, 60% of all respondents moved to the centre where their training program was offered.

Table 14
Respondent Moved From Another Location
To City Where Program Was Held

Mobility Status	#	%
Moved To Program Location	741	60
Did Not Move To Program Location	498	40
Total	1,239	100%

Overall, as shown in Table 15, 14% (N=167) of respondents indicated their training program did not meet their expectations.

Within program groups, approximately one in five (22%) Service program respondents indicated their expectations had not been met.

Table 15
All Respondents:
Program Did Not Meet Respondent's Expectations

Program Group	Program Did Not Meet Expectations		Total Respondents
	#	%	#
Business	32	14	224
Health	33	9	362
Industrial	53	14	393
Service	23	22	103
Technology	26	17	157
Overall	167	14%	1,239

The survey respondents rated their training on the basis of six different aspects of their training program using a scale ranging from excellent to very poor (see Table 16).

In terms of overall quality of the program 98% of respondents rated their training as good to excellent.

Other aspects of the program also received a high rating. For example, 90% or more of the respondents indicated instruction, curriculum content, facilities/equipment and testing methods were good to excellent while 88% gave a similar rating to the program's length.

Table 16
All Respondents:
Rating Of Training Program

Aspect of Program	Rating				
	Excellent	Very Good	Good	Poor	Very Poor
	%	%	%	%	%
Overall Quality	16	43	39	2	0
Instruction	18	37	39	5	1
Facilities/Equipment	21	33	38	7	1
Length of Program	13	27	48	11	1
Curriculum Content	13	37	43	6	1
Methods of Testing	11	33	46	8	2

In considering the training programs' overall quality by program group, as shown in Table 17, all program areas were rated very highly by survey respondents. Business, Health, Industrial and Service program groups were rated as good to excellent by 98% or more of the respondents while 94% of respondents gave a similar rating to Technology programs.

Table 17
All Respondents:
Rating Of Training Program's Overall Quality

Program Group	Rating				
	Excellent	Very Good	Good	Poor	Very Poor
	%	%	%	%	%
Business	13	46	39	2	0
Health	16	46	37	1	0
Industrial	19	40	39	2	0
Service	16	39	43	2	0
Technology	14	40	40	5	1
Overall	16%	43%	39%	2%	0%

Employed respondents were asked to rate their training program according to how well it had prepared them for the job they obtained. As indicated in Table 18, seven out of ten (71%) of respondents in training related occupations indicated that their training program had trained them well or very well for their job while another 26% felt that their training program had prepared them adequately for their job. Only 3% of respondents in training related occupations indicated their training had left them poorly prepared for their work.

Service program respondents in training related occupations had the highest percentage indicating their program had prepared them well or very well for their job at 81%. Approximately 6% of Technology program respondents in training related occupations indicated that their training had prepared them poorly for the job they obtained.

Table 18
Respondents in Training Related Occupations:
Rating of How Well Training Program Prepared Them For Employment

Group	Very Well	Well	Adequately	Poorly
	%	%	%	%
Business	26	48	24	2
Health	28	42	28	2
Industrial	31	41	26	2
Service	43	38	19	0
Technology	26	39	29	6
Overall	29%	42%	26%	3%

All respondents were asked if they planned or wished to take future training. Approximately six out of ten respondents (62%) indicated they planned or wished to take future training (see Table 19).

Industrial programs had the highest percentage of people indicate they planned future training (67%) while Service programs had the lowest percentage of respondents interested in future training (49%).

Table 19
All Respondents: Plans/Wishes To Take Future Training

Program Group	Plans/Wishes To Take Future Training		Total Respondents
	#	%	#
Business	137	61	224
Health	225	62	362
Industrial	263	67	393
Service	50	49	103
Technology	90	57	157
Overall	765	62%	1,239

Demographics

As indicated in Table 20, the average age of all respondents was 24 years.

Within program groups the average age ranged from 23 for Business program respondents to 26 for Service program respondents.

Table 20
Average Age of Respondents

Program Group	Average Age
Business	23
Health	25
Industrial	24
Service	26
Technology	25
Overall	24

Overall, 49% (N=610) of survey respondents were male and 51% (N=629) were female (see Table 21).

However, there was a wide variation in the proportion of male and female respondents within program groups. For example, 93% of Industrial program respondents were male while 91% of Health program respondents were female.

Table 21
All Respondents: Program Group By Gender

Group	Males		Females		Respondents
	#	%	#	%	#
Business	60	27	164	73	224
Health	33	9	329	91	362
Industrial	367	93	26	7	393
Service	22	21	81	79	103
Technology	128	81	29	19	157
Overall	610	49%	629	51%	1,239

Overall, 46% (N=479) of employed respondents were male and 54% (N=629) were female (see Table 22).

Within program groups, 94% of employed respondents from Industrial programs were male while 91% of employed respondents from Health programs were female.

Table 22
Employed Respondents: Program Group By Gender

Program Group	Males		Females		Employed Respondents
	#	%	#	%	#
Business	46	25	137	75	183
Health	32	9	310	91	342
Industrial	279	94	19	6	298
Service	16	19	68	81	84
Technology	106	82	24	18	130
Overall	479	46%	629	54%	1,037

In contrast to the profile by gender of employed respondents, 65% (N=131) of respondents not employed were male and 35% (N=71) were female (see Table 23).

However, the highest percentage of males not employed was among Industrial program respondents (93%) and the highest percentage of females not employed was among Health program respondents (95%).

Table 23
Respondents Not Employed: Gender By Program Group

Program Group	Males		Females		Respondents Not Employed
	#	%	#	%	#
Business	14	34	27	66	41
Health	1	5	19	95	20
Industrial	88	93	7	7	95
Service	6	32	13	68	19
Technology	22	82	5	18	27
Overall	131	65%	71	35%	202

Overall, as shown in Table 24, 43% (N=405) of respondents employed in training related occupations were male while 57% (N=534) were female. This is a somewhat lower proportion of males and an somewhat higher proportion of females than that among all employed respondents.

Within program groups, 94% of Industrial program respondents employed in training related occupations were male while 91% of Health program respondents employed in training related occupations were female.

Table 24
Employed Respondents In Training Related Occupations: Program Group By Gender

Program Group	Males		Females		Employed Training Related Respondents
	#	%	#	%	#
Business	39	24	124	76	163
Health	31	9	307	91	338
Industrial	227	94	14	6	241
Service	15	19	65	81	80
Technology	93	79	24	21	117
Overall	405	43%	534	57%	939

As indicated in Table 25, the average gross monthly salary for respondents employed full time in training related occupations was $1,636. The highest monthly salary ($1,931), overall, was reported by respondents in training related occupations in the Health field.

Overall, the average gross monthly salary for females at $1,650 was slightly higher than the average gross monthly salary for males at $1,622. However, in all program groups, the average gross monthly salary for females was lower than that for males. For example, the average gross monthly salary for males in training related occupations in the Health area was $2,252 while for females it was $1,889.

Table 25
Respondents Employed Full Time In Training Related Occupations: Average Gross Monthly Salary

Program Group	Male	Female	Overall
Business	$1,976	$1,409	$1,559
Health	$2,252	$1,889	$1,931
Industrial	$1,385	$1,134	$1,371
Service	$1,403	$1,387	$1,390
Technology	$1,854	$1,572	$1,798
Overall	$1,622	$1,650	$1,636

Labour Market Data

An analysis of the types of occupations in which respondents were employed indicates that approximately six in ten (58%) were working in three broad occupational categories: Medicine and Health (32%), Clerical and Related (15%) and Product Fabricating, Assembling and Repairing (11%) (see Table 26).

Table 26
Employed Respondents
By Occupation Category

Occupation Category (C.C.D.O. #)	Employed Respondents #	%
Medicine and Health (31)	336	32
Clerical and Related (41)	153	15
Product Fabricating, Assembling and Repairing (85)	115	11

Program Statistics

User's Guide

In addition to a description of various aspects of the general survey response provided in the Overview of Results section, results for individual training programs are grouped by program type, i.e. Business, Health Industrial, Service and Technology, and are reported on a single page containing the following sections:

-program and location
-employment profile
-training related employment
-program evaluation
-historical employment information

Each of these sections is described in detail below.

Program [1] **Campus** [2]

Number of Graduates 50 [3] Number of Respondents 40 [4] Response Rate 80% [5]

1 The name of the training program.

2 The SIAST campus location.

3 The number of graduates surveyed.

4 The number of graduates who returned completed questionnaires. All survey results are based on this population.

5 Percentage of graduates who responded to the survey.

Employment Profile (% of Respondents) [6]

Training Related Employment: [7]		Non Training Related Employment	10% [12]
Full Time [8]	65%	Total Employed	90% [13]
Part Time [9]	10%	Unemployed	5% [14]
Self Employed [10]	5%	Not In The Labour Force	5% [15]
Total Training Related Employment [11]	80%		

6 This section describes the employment status of respondents, at the time of the survey, which was approximately six months after graduation.

7 Respondents employed in an occupation related to their training (requires or uses some or all of the skills and knowledge acquired in the program) are classified as being in training related employment.

8 Respondents employed full time in training related occupations.

9 Respondents employed part time, less than 30 hours per week, in training related occupations.

10 Respondents who are self employed.

11 Sum of all respondents in full time, part time and self employed in training related employment.

12 Respondents employed in occupations not related to their training.

13 The total of all employed respondents (training related and non training related).

14 Respondents unemployed at the time of the survey, i.e. not employed, but looking for work.

15 Respondents not in the labour force, i.e. not employed and not looking for work. The employed plus unemployed respondents are considered to be the labour force.

Training Related Employment (% of Total Training Related Employed Respondents) [16]

Most Common Occupations [17]	Occupation A	30%	Occupation D	10%
	Occupation B	20%	Occupation E	10%
	Occupation C	20%	Occupation F	10%
Most Common Industries [18]	Industry 1	40%	Industry 4	10%
	Industry 2	30%	Industry 5	10%
	Industry 3	10%		
Location of Employment [19]	Location A	40%	Location C	10%
	Location B	40%	Location D	10%

Salary (Monthly - Full Time, Training Related): [20] Average $1,900 [21] Range $1,000 to $2,500 [22]

16 Includes only those employed in training related occupations. All percentages are a percent of training related respondents.

17 Occupations of those in training related employment, as a percentage of total training related respondents. Occupations are classified into categories established by the Canadian Classification and Dictionary of Occupations (C.C.D.O.).

18 Industries of the employers of respondents in training related occupations. Industries are categorized using the Standard Industrial Classification for Saskatchewan (S.I.C.).

19 Location of employment for respondents in training related occupations, based on employer's address and classified using Saskatchewan Hospital Services Plan (S.H.S.P.) coding system.

20 Gross monthly salary (before deductions) as stated by the respondent, for full time, training related employment.

21 The average monthly salary for all full time, training related occupations.

22 Range from lowest to highest of monthly salary for full time employment in training related occupations.

Program Evaluation (Overall Quality Rating - % of All Respondents) [23]

Excellent	Very Good	Good	Poor	Very Poor
20%	50%	20%	10%	0%

23 All respondents were asked to rate the overall quality of their training program. Respondents chose one of: excellent, very good, good, poor or very poor. Percentages are a percent of all who answered this question.

Historical Employment Information [24]

Respondents Employed Full Time:		Year of Graduation 1984	1985	1986	1987	1988
Training Related Occupations	[25]	70%	65%	70%	60%	65%
All Occupations	[26]	75%	65%	85%	70%	70%

24 This section presents information from this year's survey (1988) as well as selected results from the Graduate Follow-Up Survey from the years 1984 to 1987.

25 Yearly percentages for Training Related Occupations represent those respondents employed full time in training related occupations.

26 The percentages for each year for All Occupations are those respondents employed in full time in any occupation at the time of the survey.

A Notes section appears at the bottom of each page. One or more notes may be included to give further details on any of the training programs. These notes may explain some of the employment statistics or may give further details about the training program which may affect employment.

Some of the following notes may be used:

Notes

- * Represents one respondent.

- Caution: Small number of respondents.
- Caution: Low response rate.

- The two respondents in part time training related employment were looking for full time employment.
- One employed respondent was also attending school.
- The one unemployed respondent had worked since graduation.
- The one respondent not in the labour force had returned to school.
- All six respondents were male.

- Competency based education program.
- Optional co-operative education program.
- Mandatory co-operative education program.
- This program is subject to seasonal employment demand.
- Program offered in one week to four week modules.
- New to survey.

See User's Guide for explanation of percentages and other information.
